PROJECTS

mts-online.com

Project Brief

Contributed to a client-based SaaS product (mts-online.com) for the hospitality industry. Built embeddable widgets with CDN-based plugin URLs for seamless integration across external websites. Developed lightweight, high-performance websites along with a hotel room booking engine. Implemented smart email automation and intelligent response systems to enhance guest communication. Designed and maintained a guest management portal to streamline hotel operations and workflows.

Tools/Technologies

Next.js, Node.js (REST APIs / Socket.io), MongoDB, PostgreSQL, GPT API, Hetzner Cloud, GitLab, Docker, GraphQL, React.js, Tailwind, RAG, LLM prompting, payment integration

Roles/Responsibilities

Software Analyst

Okloop.io

Project Brief

Developed Okloop.io, a SaaS platform facilitating seamless video uploading and widget creation, with integrated CDN plugin URLs for universal website compatibility. Users can embed these URLs into their websites to display videos. Additionally, Okloop Portal offers comprehensive analytics, accessible to users via email, Google, or Outlook login methods, showcasing video playback metrics and engagement data for analysis.

Tools/Technologies

Angular 15, Node.js Rest API, MY SQL, AWS S3, EC2, Cloud Front, Bit bucket, GCP, Azure

Roles/Responsibilities

Tech Led

Enquiry Tracker

Project Brief

Implemented and managed Pipeline, a robust CRM solution tailored for K-12 schools, facilitating streamlined communication and relationship building with prospective families. Leveraged Apply functionality to simplify online application processes, customizing forms and seamlessly integrating with existing data for enhanced efficiency. Successfully optimized enrollment procedures, ensuring accurate data collection and nurturing of future families.

Tools/Technologies

Angular 15, Node.js Rest API, Express.js, MYSQL, GCP, Python, Bit bucket

Roles/Responsibilities

Senior Full Stack Engineer, Tech Led

Kemsys - kpix.io

Project Brief

Developed KpiX-IOT, A pioneering asset management and aftermarket opportunity mining platform, streamlining processes and empowering teams. Automated opportunity identification, generated targeted aftermarket lists, and extended platform capabilities to dealer networks for enhanced service delivery.

Tools/Technologies

Angular 14, C# Rest API, Mongo DB, Azure, Python, Bit bucket

Roles/Responsibilities

SaaS & Product Engineer

Audtech

Project Brief

Led development of a cloud-based Audit Platform at AudTech Solutions, streamlining audit processes for accounting firms. Ensured compliance, efficiency, and quality while reducing costs, and provided ongoing support for firms navigating regulatory changes and technological advancements.

Tools/Technologies

Angular 8, Java Spring Boot Rest API, PostgreSQL, AWS , AWS server late ,Bit bucket

Roles/Responsibilities
